PROFESSIONAL SUMMARY

Support Technician with 3+ years of experience delivering Level 1 & Level 2 IT support across Microsoft-based enterprise and cloud environments. Strong hands-on experience with Windows Server, Active Directory, Azure AD (Entra ID), Microsoft 365 and Exchange, plus desktop, network and end-user troubleshooting. Skilled in ticketing systems (ServiceNow) and ITIL-aligned incident and request management, with a track record of meeting SLA targets in fast-paced, high-volume environments. Comfortable working across the full stack — from desktop through to cloud infrastructure — with strong communication and a genuine interest in solving real technical problems.

KEY SKILLS

Microsoft Infrastructure: Windows Server, Active Directory, Azure AD (Entra ID), Microsoft 365, Exchange, Intune, Windows 10/11, Outlook, Teams

Service Desk & ITSM: ServiceNow, ITIL, Incident Management, Request Management, Root Cause Analysis, SLA Compliance, Ticketing Systems

Support & Networking: Technical Support, End User Support, Desktop & Server Support, VPN, RDP, LogMeIn, LAN/WAN, VMware vSphere, OpManager

Compliance & Customer Care: Identity Verification (ID&V), Data Privacy & Security, Customer Support, Attention to Detail, Troubleshooting

PROFESSIONAL EXPERIENCE

Customer Service Agent – Card Disputes (DBA Team) | Probe CX

Apr 2026 – Present

- Handle high-volume inbound calls relating to card disputes, lost and stolen cards, unauthorised transactions, and general banking enquiries.
- Perform Identity Verification (ID&V) and process customer requests in accordance with banking security, privacy and compliance requirements.
- Manage account maintenance activities including PIN changes, statement requests, password resets, payment arrangements and customer detail updates.
- Investigate unauthorised transaction claims and process dispute cases using internal banking systems.
- Navigate multiple applications simultaneously to document customer interactions accurately and maintain real-time case records.
- Ensure first-contact resolution wherever possible by following established procedures and meeting quality, compliance and SLA standards.
- Collaborate with Team Leaders and Quality Assurance teams to continuously improve service delivery and customer outcomes.

Service Desk Analyst | Zensar Technologies

Dec 2022 – Dec 2025

- Provided Level 1 & Level 2 technical support to end users via phone, email and remote support tools.
- Logged, prioritised, investigated and resolved incidents and service requests using ServiceNow following ITIL best practices.
- Supported Windows 10/11, Windows Server, Microsoft 365, Exchange Online, Outlook, Teams and Office applications.
- Administered Active Directory and Azure AD (Entra ID), including user account management, password resets, account unlocks and access provisioning.
- Delivered remote technical support using RDP, LogMeIn and other remote support tools.
- Monitored infrastructure using VMware vSphere, OpManager and Arcserve — responding to system alerts, monitoring backup jobs, performing basic data restores, documenting recovery activities and escalating incidents when required.
- Maintained accurate ticket documentation and knowledge base articles while ensuring SLA compliance and delivering excellent customer service.

Game Tester (QA) | Ubisoft

Nov 2020 – Dec 2022

- Performed manual testing on AAA game titles across multiple game builds and platforms to ensure functionality, stability and performance.

- Designed and executed regression, smoke, functional and exploratory test cases using TestRail.
- Identified, documented and tracked gameplay, UI, audio and performance defects using Jira, ensuring accurate defect reporting and timely resolution.
- Collaborated with developers, designers and QA teams to verify bug fixes, perform regression testing and improve product quality.
- Maintained detailed test documentation and defect reports while meeting project deadlines in an Agile development environment.
