

# ABHILASHA JAGTAP

*IT Support Engineer (information Technology Support Engineer)*

IT Support Engineer with 3+ years providing Level 1 & 2 IT support in Microsoft-based environments. Handles incident management, ticketing systems, and end-user support for Windows, Microsoft 365, and Active Directory. Works in a high-volume banking environment managing customer enquiries and dispute cases while meeting SLAs and maintaining compliance.

## EMPLOYMENT HISTORY

---

### CUSTOMER SERVICE AGENT – CARD DISPUTES (DBA TEAM)

**Apr 2026 – Present**

#### *Probe CX*

- ♦ Handled high-volume inbound calls about card disputes, unauthorised transactions and fraud claims
- ♦ Performed ID&V per compliance and security requirements
- ♦ Investigated transactions and logged cases in internal systems
- ♦ Delivered customer service while meeting KPIs: AHT, quality, first-call resolution
- ♦ Reviewed disputed card transactions with case management tools
- ♦ Closed dispute tickets within SLA, applied company policy and updated notes for auditors
- ♦ Reconciled refund requests with transaction logs and recommended balance adjustments
- ♦ Used ticketing filters to triage high-risk cases and shorten initial fraud response time

### SYSTEM ENGINEER

**Dec 2022 – Dec 2025**

#### *Zensar Technologies*

- ♦ Provided L1 and L2 IT support by phone, email, and remote tools in a ticketing environment
- ♦ Logged, categorized, and resolved incidents and service requests following ITIL processes
- ♦ Supported Windows 10/11, Microsoft 365, and managed Active Directory user accounts
- ♦ Performed password resets, unlocked accounts, and provisioned user access
- ♦ Troubleshoot VPN, network connectivity, and remote access issues
- ♦ Worked with ServiceNow, RDP, and remote support applications
- ♦ Maintained ticket notes, documentation, and knowledge base articles
- ♦ Met SLAs and kept high customer satisfaction
- ♦ Monitored system performance with VMware vSphere and OpManager and responded to alerts and incidents
- ♦ Processed and escalated 2nd-level incidents in ServiceNow with clear RCA notes for engineering teams.

### GAME TESTER (QA)

**Nov 2020 – Dec 2022**

#### *Ubisoft*

- ♦ Worked as part of the QA team on a AAA game title, ensuring optimal performance, stability, and playability across multiple game builds and platforms.
- ♦ Identified and reported gameplay, UI, audio, and performance-related bugs using the Jira bug tracking system; followed up with developers to ensure resolution and accurate status updates.
- ♦ Designed, executed, and maintained manual test cases in TestRail for regression, smoke, functional, and exploratory testing across various game features.
- ♦ Collaborated closely with cross-functional teams including game designers, artists, and developers to provide early feedback and enhance feature stability during development.
